

What is Freedom?

- (1) Brainstorm: Make a list describing, in as many ways as possible, what freedom is. (Give examples of what freedom means in different spheres of life like food, clothing, shelter, water, air, people, animals, language, press, speech, thought, sound, feeling, etc)
- (2) Now discuss the following question, with reference to the definitions and different aspects of freedom:

How would my life be different if India had never gotten Independence from Britain?

(Think about all the different aspects of your life – what you do each day, what you eat, what you wear, how you speak, how you think, the things you use, what your home and city look like, etc.)

Each student should take notes about the group discussion and the important points that were made, and what agreements and disagreements there were between different members of the group.
