

A Strange Animal

COLLABORATION

Fold a piece of paper into three equal parts.

Don't let anyone see you draw the head of a person or animal on the top third of the paper.

Make two little marks on the middle third to show where the neck is.

Then fold the paper so that only the middle third is visible and give it to a friend to secretly draw the middle part of the person or animal. Do not tell them or let them see what you drew. No one should see what they are drawing.

Then that person should make little marks to show where the legs begin on the bottom third of the paper. They should fold the paper so that only the bottom third is visible and give it to a third person to make the legs or bottom part of the person or animal - without seeing what anyone else did.

When done, unfold the paper and see the strange creature you have made!
